To whom it may concern,

I Would like to write this letter to the School board and the members of Parsons thanking them for the opportunities to participate in the building of the new schools from the ESPLOST program. At the beginning they refused to let me bid on demolition jobs because of the 5 project clause that the CM At-Risk had in play. After talking to the School board and asking them the magic question "How do you get to five if you never start at one?", they allowed me to participate and I now have 3 schools under my belt. Completed on time and within budget. This shows you what can happen if you give a dedicated person an opportunity.

I'm not saying it will happen like this with everyone, but it did with me. It put me in a better financial position as well as helped me create a bonding line. So I say again, thank you School Board President, Members, Superintendent, and members of Parsons. Especially Mr. Formey for being there to help me through the logistical questions of the format.

Sincerely yours,

Bobby L. Adams
President
B and B Demolition and Contractors, Inc.

Bobby "Sarge" Adams

"With ESPLOST II, locals . . . had more opportunities to make contacts and to display our talents."

Bobby "Sarge" Adams
