Kenmore 24" Built-In Dishwasher with Third Rack - Efficient Cleaning and Quiet Operation

The 24" Kenmore built-in dishwasher with Third Rack 1481 offers the MicroClean™ Wash System that features an innovative filter that delivers peak cleaning performance in less time with less water. In four steps, your wash water is pulled into the system's cylinder, spun and rotated at 3,400 RPMs to remove soils that are then flushed out and the cleaned water is recycled for use throughout the remainder of the cycle. This unit also provides a premium adjustable upper rack with 52 smooth glide ball bearings on each side of the rack that work together to provide a smooth experience when pulling out the rack when empty or fully loaded. And at 44 dBA, this dishwasher has been designed to clean so quietly, you won't even wake a sleeping baby.

The exclusive 360° PowerWash® Technology spray arm delivers a far-reaching spiral pattern throughout the dishwasher cleaning even those hard to reach areas

The MicroClean™ Wash System is an innovative filter feature that delivers peak cleaning performance in less time with less water

The exclusive TurboZone Reach™ reaches corners and deep cleans inside the bottoms of bowls, bottles and glasses

SmartDry™ Plus Technology extends drying time for our best drying

At 44 dBA, this dishwasher has been designed to clean so quietly, you can do just about anything without being interrupted

Removable third rack provides 37% more loading area, cleaning an entire flatware collection, knives and small utensils
